“AudioBookShelf deserves applause for its slick interface.” - SmokingApples.com

From the makers of Audiobooks comes a unique, fun, and extremely useful app to listen to some of history's most treasured masterpieces - AudioBookShelf.

Unlike other audiobook applications, AudioBookShelf has been carefully curated to include only the highest quality audiobooks. Using audiobooks from the LibriVox project, which has volunteers from around the world read their favorite books, we took the time to identify the most popular books with the best readers. We did all the work for you; your only job is to enjoy high-quality audiobooks at the touch of your finger.

Other audiobook outlets charge \$9 or more for each of these types of books. AudioBookShelf currently contains twelve classics all for one low price, which is a savings of over \$100.
